Calculates time and date of Spring & Autumnal (Fall) equinoxes and Summer and Winter solstices all over the world. Note that the seasons are opposite on either side of the equator, so spring in the northern hemisphere is fall in the southern hemisphere and vice versa.

### **Seasons Calculator - Time and Date**

Summer is the hottest of the four temperate seasons, falling after spring and before autumn. At the summer solstice, the days are longest and the nights are shortest, with day length decreasing as the season progresses after the solstice. The date of the beginning of summer varies according to climate, tradition, and culture. When it is summer in the Northern Hemisphere, it is winter in the Southern Hemisphere, and vice versa.
